

Dear Intercom Engineering Team,

I'm writing to express my interest in the Frontend Engineer position on your Frontend Tech Platform team. With a strong background in building performant React applications and a passion for improving developer experience, I'm excited about the opportunity to help shape how Intercom delivers fast, scalable, and high-quality user interfaces.

My experience includes architecting reusable frontend systems, enhancing UI performance using React hooks and modular design, and collaborating closely with backend and design teams to ship robust features. I've also led efforts to streamline development workflows, including custom tooling and build optimizations.

Intercom's mission to empower teams with efficient infrastructure deeply resonates with me. I'd love to contribute to your culture of engineering excellence and help elevate frontend standards across the organization.

Thank you for considering my application. I look forward to the opportunity to bring value to your team.

Warm regards,

Dinesh Kumar Rana
